CARDIAC CARE PROGRAM

High Blood Pressure • Chronic Heart Failure • Cardiomyopathy • Coronary-Artery Disease • Stroke • Heart Attack • Peripheral Vascular Disease • Transplant

Cardiac Care Program:

Better Care Home Healthnurses are available to assess chest pain, heart and lung sounds, respiratory difficulties, and wounds to provide the necessary physician-ordered care. Our Cardiac Care Program provides patient education and self-empowerment for medication adherence to reduce the need for hospitalizations and ER visits and to delay the onset of cardiac complications. Using standardized educational programs, patients are taught healthy heart living, how to care for themselves following cardiac procedures and surgeries, and are given knowledge about the cardiac drugs that have been prescribed. Care is directed by the patient's physician and brought to the patient through highly trained and experienced cardiovascular nurses. To keep cardiac patients heart-healthy at home, they provide:

- Case management by RNs
- Infusion Treatment at home
- Oximeter testing
- Point of care PT/INR testing
- Disease management services for HF, cardiac surgery and COPD
- Telemedicine monitor with disease management protocols
- Falls prevention identification and education
- Wound care and ostomy management treatment

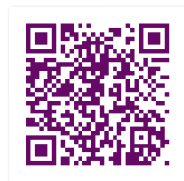

The program will provide the patient/caregiver the following benefits & support:

- Patient education and self-management tools
- Cardiac specific educational materials
- Telemonitor Services as requested by MD – following MD parameters.
- Coordination of DME and Assistive Devices
- Support from our Clinical Team to ensure that your patients understand how to best manage their condition
